

## BRITE DECK

Composite decking is 70% faster to install than wood. Environmentally friendly and looks like timber.

Britedek has been manufactured since 1983 and available in Australia since 1999. We are an Australian owned company manufacturing our own decking and shipping Australia wide.

## COMPOSITE DECKING

- Canadian design
- Environmentally friendly
- Highly resilient anti-slip
- Safe for ramps, walkways and pools
- No warping, cracks or splitting
- No staining or sanding
- Easy installation
- Absolutely no maintenance
- 15 year manufacturers warranty

# BRITE DECK

## THE QUALITY ALTERNATIVE TO TIMBER

Brite Composite Deck is an alternative decking product made from reclaimed wood fibres and durable polymers, making it an Eco-friendly and durable solution.

Our maintenance-free decking will save you valuable time and money. No painting and no staining is required, it comes ready to go. Brite Decking does not splinter or split and you can expect the best from factory direct products with massive savings and the 15 year manufacturers warranty.

### Colour Range

We offer 5 different contemporary & exciting colours for you to choose from and 2 distinct timber textures.

### Durable

Our products are resistant to termites, moisture and mildew.

### Efficiency

Hidden fastenings are used on timber or metal sub frame joists. There is no drilling into the composite decking surface. These fixings automatically give the deck room to breath as they space boards and free your deck of ugly nails or screws on the face of the Brite Deck.
