140mm & *210mm

*210mm Custom Only (80sqm above)

NEXTGEN TITANIUM: WHERE ENGINEERING MEETS ELEGANCE

NextGen Titanium isn't just decking — it's architectural craftsmanship. Engineered on a rigid PVC core and encased in a dual-layer ASA shield, it delivers unrivalled performance in Australia's harshest climates. Originally developed for the automotive industry, ASA ensures long-term resistance to UV, cracking and warping — backed by BAL 29 fire compliance and an R11/P5 slip rating for peace of mind underfoot.

Finished in a refined sanded texture, each board reflects designer intent — elegant, tonal, and meticulously detailed. Available in both 140mm and 210mm profiles, Titanium offers streamlined installation and a statement finish that elevates any project.

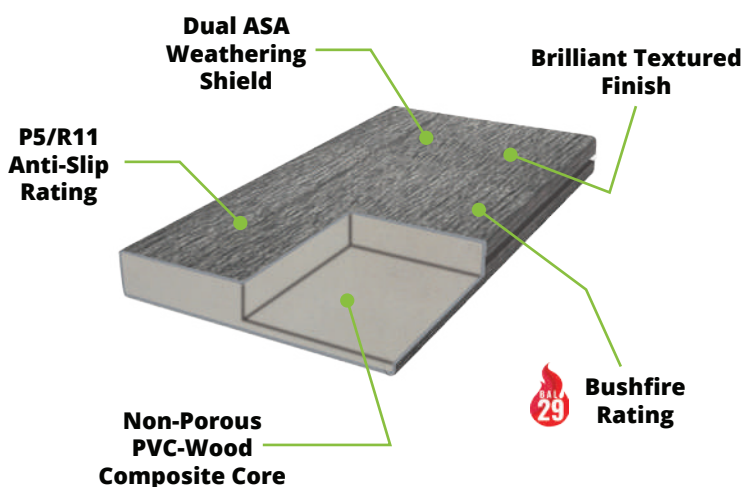

Available in matching Fascia and Edging Boards

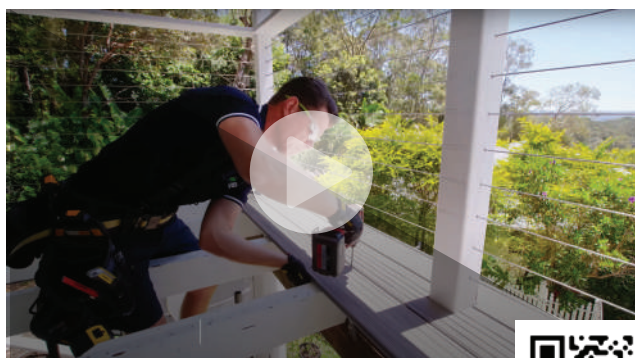

SPECIFICATIONS:

	Length (m)	Dimensions (mm)	Boards (per 10sqm)	Optimal Span Residential	Optimal Span Commercial	Slip Rating	Fire Properties	Overhang (mm)	Weight (kg)
