Wood Plastic Composite

MAXIMUM SUPPORT DISTANCE (SPANS ARE INDICATIVE ONLY)

**NON-LOAD-BEARING
(FENCING / SCREENING)**

1,000 mm

**JOIST SPAN
(DECKING)**

400mm

FIXING OPTIONS

METAL SUB FRAME

- Face fixed using self-drilling metal screws
- S5410 Stainless Steel with Dacromet coating and colour-matched head
- Phillips drive, ribbed countersunk head and wing-tipped for clean and consistent fixings

TIMBER SUB FRAME

- Face fixed using partially threaded timber screws
- S5410 Stainless Steel with Dacromet coating and colour-matched head
- Phillips drive, ribbed countersunk head and threadless shank for improved board clamping and reduced jacking effect during installation

*Application suitability, structural adequacy and compliance should be confirmed by the installer/builder for each project.
