LEG ASSEMBLY

- Position one 40mm Leg Tube (L1) at each corner of the frame. Secure each Leg Tube using two Triangular Clips (TL), as shown.

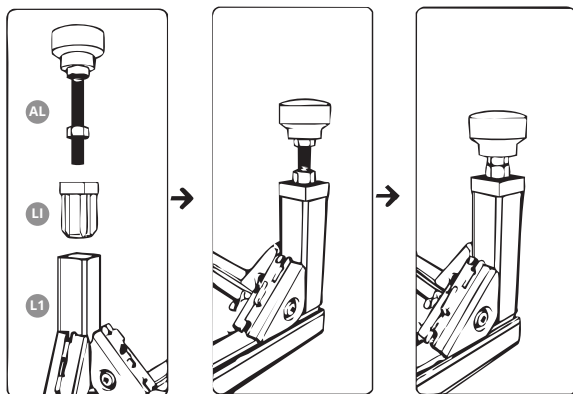

- Insert Leg Insert (LI) into each Leg Tubes (L1)

- Screw one Adjustable Leg (AL) into each Leg Insert (LI)

- Rotate each Adjustable Leg (AL) to set the required frame height and level

- Once the required height and level are set, tighten the lock nut against the Leg Insert (LI) to secure the adjustment

- Check that all legs and fixings are secure and that the completed frame is level and stable before installing the decking

NOTE: All diagrams, dimensions, and illustrations in this guide are indicative only and not drawn to scale. Actual component lengths, measurements, and proportions may vary from those depicted. Refer to the product specification sheet for precise dimensions.
